Experience

Freelance Full-Stack Web Developer

2025 December

Client Project: 3D Shopping Website | Live Website

- Designed and delivered a production-ready 3D e-commerce application using Next.js, React, Tailwind CSS, and React Three Fiber.
- improved backend services with Node.js, Express.js, and MongoDB, implementing JWT authentication and role-based access control.
- Engineered secure RESTful APIs for user authentication, product management, cart operations, and order processing.
- Integrated interactive 3D product visualization to improve user engagement and browsing experience.
- Deployed the frontend on Vercel and configured environment variables to ensure stable production builds.

Projects

NextBlogger — Full-Stack Blogging Platform | Live Demo

- Built a full-stack blogging platform using Next.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication, role-based authorization, and secure RESTful APIs.
- enhanced features for blog creation, editing, deletion, search, and pagination.
- Optimized frontend performance through reusable components and efficient code splitting.

3D Portfolio Website — Frontend Application | Live Demo

- Built an interactive portfolio using React.js, React Three Fiber, GSAP, and Tailwind CSS.
- Enhanced visual experience with animated 3D models and smooth UI transitions.
- Ensured responsive design and cross-browser compatibility.

Medicinal Plants Identifier — Machine Learning Web App | GitHub

- Built a CNN-based image classification system using Python, TensorFlow, and Keras.
- Developed a Flask-based web interface for image uploads and real-time predictions.
- Trained the model on 10,000+ images, achieving approximately 90% classification accuracy.
